## LETTER OF RECOMMENDATION

I take great pleasure in recommending **Ms. Kadaveru Keerthi Samhitha** in her pursuit of higher educational qualification in your esteemed university. As her instructor I taught her **Microwave Engineering** and **Analog Electronics** course in her under graduation, I was able to closely monitor and guide her in the course work during this period.

In my interactions during the course, I have observed her growth into a poised and accomplished young technocrat. She was well-rounded student who completed all her assignments, projects, and tasks on scheduled time. It's clear that she has a great deal of experience in the lab, as well as in excellent inter personnel skills. She always put in the effort necessary to get good grades in every subject.

She has been curious about learning new technics and she also has unique ways to solve problems. I have always seen her enthusiastic in doing challenging experiments, She maintains a good rapport with all students in class by helping them whenever needed. She is fluent in both spoken and written English as well as been able to work on her own and as an organizer and leader, she has the personality to succeed in group discussions and she enjoys working on interesting projects that require her to produce good results.

**Ms. Keerthi Samhitha** continues to impress me with her knowledge, skill, and dedication. I'm sure you will find her to be a student whose talents will only shine further through your graduate program, where she can secure adequate financial aid. I wish her the best wishes for her further academics and professional endeavors.

  
**Mr. S. Sivaiah**
