LETTER OF RECOMMENDATION

I'm pleased to recommend **Ms. Kadaveru Keerthi Samhitha** for her graduate studies at your prestigious university. I taught her **Digital Signal Processing**, having spent a fair amount of time, I noticed her performance in academics as well as sports since last four years. She had a great deal of experience when it came to completing tasks and setting goals, and always invested a great deal of time and effort into whatever she was doing. She was a great asset to any team or project and was never afraid to take on a challenge.

I found her to be a hardworking and conscientious student who takes great care in the preparation and completion of her assignments. She's a good team player who always goes above and beyond the call of duty, which puts her ahead of the students in lab classes. When it comes to organizing various departmental events, she's always been the first to jump and take on new duties. She is a great fit for any research team because of her exceptional communication skills and pleasant attitude. I remember she took part in NASA Space App Challenge which showcases her capability to prosper in challenges.

I believe Keerthi Samhitha is an exceptional student who has a strong desire to continue her education in her field of choice. After reviewing her performance, I consider her for pursuing higher education. As a result, I strongly recommend her for your university's graduate program.

I'm confident she'll be an ideal fit for the programme. Your university's graduate programme will allow her to pursue a prosperous career. I strongly recommend her for admission at your renowned university, where she will receive full financial support. I convey my best wishes to Keerthi Samhitha in her endeavour to acquire knowledge through higher studies.

Mrs. M. Premalatha
