LETTER OF RECOMMENDATION

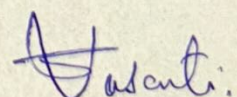

I am extremely pleased to recommend **Ms. Kadaveru Keerthi Samhitha** for graduate studies at your esteemed university. I have known her for the past four years of her bachelor's degree program where I taught her **Embedded System Design**.

I have also overseen her Major Project titled **Multiple Motion Control System of Robotic Car Based on IoT** where I was an internal guide. She has given me enough opportunity to assess her sincerity, commitment towards studies. She is quite creative in her insights and perspectives, and I have observed that she has a remarkable capacity for problem-solving.

She is an enthusiastic, optimistic, outspoken, and amiable student. I strongly believe that she will score amazing grades in your university. Apart from academics, she has keen interest towards exploring new technologies. She doesn't limit her study to the textbook and is zealous to find out more. So, her knowledge of the subjects is thorough and understands the concept in a better way. She has never lost confidence over the years that I have known her, and she has made significant progress in her academics and expertise.

I believe that her endurance and analytical skills will contribute significantly to the research at your institute, and I strongly recommend her for the graduate program at your university.

S. Vasanti
